

From CAD to interactive 3D presentation, in just a few clicks.

Autodesk® Design Suite extends your familiar AutoCAD® workflow with easy-to-use sketching and visual communication tools—at a savings of 31 percent*.

With Autodesk Design Suite, having all the tools you need at your disposal combined with the cost savings you get is pretty amazing. SketchBook Designer is very intuitive, and its ability to sketch on top of AutoCAD files is fantastic. Showcase is a game-changer because it adds interactivity to the way we present architectural designs to clients.

Autodesk Design Suite helps any AutoCAD user enhance the design process with easy-to-use visual communication workflows, helping to explore design concepts and create effective design reviews, stunning marketing materials, and convincing sales presentations.

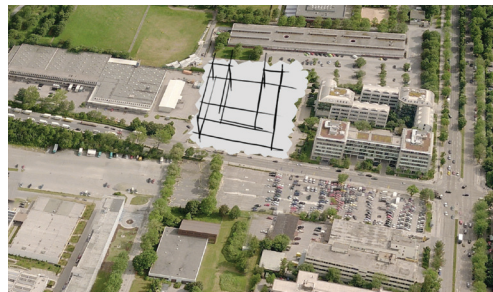

- **Visually explore and develop ideas** with integrated concept sketching and design tools
- **Review design alternatives in context** with easy-to-use, real-time presentation and rendering solutions
- **Communicate more clearly and efficiently** with compelling imagery, movies, and interactive presentations

AutoCAD 2012

Design and shape the world around you with one of the world's leading CAD tools. With new and updated tools for 3D conceptual design, model documentation, and reality capture, AutoCAD 2012 software helps you maximize productivity and quickly drive projects to completion.

Autodesk® SketchBook® Designer 2012

Sketch concept designs to scale and link to them directly within AutoCAD software. Tap into a unique hybrid paint and vector illustration workflow to explore creative design concepts and communicate ideas graphically.

Showcase is such a powerful visual communication tool. The quality of presentation material I can generate is excellent—not to mention the way I can easily go into the system and change colors, or set up animations, turntables, and flybys. I can spin the designs around, see the play of highlights across surfaces, and communicate exactly how designs will look from all angles.

Showcase is a true game-changer when we present architecture designs to our clients. It brings 3D rendering to a higher level of interactivity, and provides the ability to explore materials and environments on-the-fly. I don't have to come back to the office and press "render" every time I want to show my client another material alternative. With Showcase, the time savings are incredible.
