

Autodesk Alias Fundamentals

Course Description

Alias is the premier CAD studio application for concept and surface design enabling you to create high-quality, feasible CAD models. This course will teach you how to create, modify and analyse data and export this data into formats that are usable in other CAD applications.

Prerequisites

A working knowledge of CAD modelling.

Topics Include

-  Mainpulating views
-  Manipulating entities
-  Working with layers
-  Sweeping
-  Extruding
-  Revoloving
-  Offsetting
-  Blending
-  Modifying Geometry
-  Moving, scaling, flipping and rotating objects
-  Trimming Curves
-  Trimming Surfaces
-  Creating curves
-  Creating copies of objects
-  Aligning objects
-  Combining objects
-  Splitting objcts
-  Anaylsing geometry
-  Shading models

Course Duration: Bespoke
