

Autodesk Inventor CAM Advanced Machining

This course builds on the 2D/3D topics and will provide you with an understanding of the more advanced multi-axis capabilities within Autodesk Inventor CAM software. Through hands-on exercises, you will acquire the key skills and knowledge required to produce 4 and 5-axis CNC programming using the Inventor CAM software.

Course Modules

- *Advanced Job Setups*
- *3+2 Machining Operations*
- *4th Axis Wrapping*
- *Swarf Machining*
- *Advanced Turning*
- *Secondary Spindle Operations*
- *Turret Operations*

Prerequisites

Prior knowledge of machining techniques is recommended. Inventor or Fusion 360 knowledge is required.

Course Duration

1 day
