

Autodesk VRED Fundamentals

On this course you will learn the function of Autodesk VRED in a workflow context. It is ideal if you are a CAD modeller wanting to improve speed and superior quality of real-time dynamic rendering or if you're a manager or designer wanting to create super high quality rendering for presentation materials.

Course Modules

- *Introduction and Navigation*
- *Data Preparation*
- *Data Optimisation*
- *VRED Scenegraph*
- *Materials*
- *Material Management*
- *Cameras (Setup and Viewpoints)*
- *Lighting Models in OpenGL*
- *Ray Tracing*
- *Rendering*

Prerequisites

A working knowledge of CAD modelling.

Course Duration

2 days

Next Steps

A Bespoke Course
