

BIM 360 Build: Fundamentals

Learn the core functionality of Autodesk BIM 360 Build, alongside crucial system administration and configuration techniques. The first half of the day covers the principles of using the BIM 360 Build system. In the second half of the day, we will look at your own BIM 360 Build configuration and assist with the project setup and configuration, as well as providing recommendations on industry standards and best practice.

Course Modules

- *User Interface and Navigation*
- *Adding Members and Controlling Permissions*
- *Working with Quality Control Programmes*
- *Managing Job Site Safety Management*
- *Configuring Templates*
- *Ensuring Smooth Handover of Equipment*
- *Administrating Collaboration*
- *Creating Operational Reports*

Prerequisites

An understanding of construction project terminology is recommended. A subscription to Autodesk BIM 360 Build and an iPad 4 or newer with the Autodesk BIM 360 Build Application would be beneficial.
