

Fusion 2D/3D Machining and Turning

COURSE DESCRIPTION

This Fusion training course will provide you with an understanding of the Integrated CAM functionality within Autodesk Fusion software. Through hands-on learning, you will acquire the key skills and knowledge required to produce 2.5 and 3-axis CNC Programs using the Fusion software.

COURSE MODULES

- Autodesk Fusion CAM Interface
- Creating a Job Setup
- Creating and Using Tools in the Library
- Simulation and Post Processing the Job
- Face Milling
- 2D Strategies for Contouring and Pocketing
- 2D Strategies for Adaptive Clearance
- Drilling Operations
- Strategies for Circular, Slot and Trace Machining
- 3D Machining Strategies
- Semi Finishing Strategies for 3D Parts
- Finishing Strategies for 3D Parts
- Basic Turning Operations
- Operations for Threading and Chamfering
- Creating Setup Sheets

OTHER INFORMATION

Prerequisites

Knowledge of machining techniques and Inventor, SolidWorks or Fusion is recommended.

Course Duration

1 Day

Next Steps

Fusion Advanced Machining
