

Fusion 360 Advanced Machining

This Fusion course builds on the 2D/3D topics and will provide you with an understanding of the more advanced multi-axis capabilities within Autodesk Fusion 360 software. Through hands-on exercises, you will acquire the key skills and knowledge required to produce 4 and 5-axis CNC programming using the Fusion 360 software.

Course Modules

- *Advanced Job Setups*
- *3+2 Machining Operations*
- *4th Axis Wrapping*
- *Swarf Machining*
- *Advanced Turning*
- *Secondary Spindle Operations*
- *Turret Operations*

Prerequisites

Prior knowledge of machining techniques is recommended. Our Fusion 360 2D/3D Machining and Turning course.

Course Duration

1 day
