

GLOBAL CONSUMER ELECTRONICS BRAND

CUSTOMER CHALLENGE

In order for this client to remain at the front of the industries they work in, they needed to be able to predict the multiple plastic injection moulding process.

PROJECT GOALS

The key goal of this project was to have the ability to accurately predict finish quality and product performance, allowing them to minimize risk/error and increase productivity.

SOLUTION

Man and Machine provided the client with the following services:

- Software Asset Management
- Software User Optimisation
- Software Support Services
- Product User Training
- Fill, Pack and Wrap Assistance

BUSINESS OUTCOMES

Man and Machine helped to implement the required software, train and support the project engineers, as well as implementing and managing the full injection moulding analysis process. Users now not only know how to use the software, but how to solve product failures, resulting in less time wasted and more profitability for the client.

CONCLUSION

"Man and Machine have helped our users become proficient Moldflow users and thanks to them, our users can quickly analyse moulding processes, saving us a lot of time and money."
