

Revit Collaboration Tools

COURSE DESCRIPTION

Autodesk Revit is a Building Information Modelling tool used by multiples disciplines within the construction industry. Needless to say, that during a project many individual designers and organisations can be working on the design of the building, meaning that collaboration and coordination on the project is of the utmost importance. Our Autodesk Revit Collaboration Tools course will enable delegates to increase their productivity whilst working with other individuals on a project, either within the same or different organisations. This is a multi-disciplined course with practices for Architecture, MEP and Structural disciplines.

COURSE MODULES

- Set up Project Phasing
- Create and Display a Variety of Design Options
- Use Groups
- Link Autodesk Revit Files
- Use Multi-Discipline Coordination
- Use Copy/Monitor and Coordination Review
- Import and Export CAD and Raster Files
- Export Revit Models for Energy Analysis
- Understand, Use and Set Up Worksharing

OTHER INFORMATION

Prerequisites

You should be comfortable with the fundamentals of Autodesk Revit.

Course Duration

1 Day
