

# Solibri Fundamentals

## Course Description

This course is ideal if you are a new user of Solibri Model checker, looking to get started with the exploration of BIM models and model validation. By attending this course, you will have the opportunity to learn the core commands and actions in Solibri Model Checker and understand the basics of rule based assessment and communication.

## Prerequisites

A good working knowledge of 3D design is desirable, preferably using Revit software.

BIM Coordination

**bim**  **ready**™
