

## Solibri Fundamentals

This Solibri training course is an essential introduction if you are a new user of Solibri Office, looking to get started with the exploration of BIM models and model validation. You will be taught the core commands and actions in Solibri Office and understand the basics of rule based assessment and communication.

### Course Modules

- *Introduction and Principles of BIM*
- *Introduction to Solibri*
- *Demonstration of Solibri Office*
- *User Interface and Key Settings*
- *Model Handling and Visualisation*
- *Making Selections with the Selection Basket*
- *Handling Merged/Federated Models*
- *Checking the Model with Rules*
- *Communication*
- *Model Comparison and Revision Update*
- *Information Take Off Basics*
- *Additional Settings*

### Prerequisites

A good working knowledge of 3D design is desirable, preferably using Revit software.

### Course Duration

1 day

### Next Steps

Solibri Rules Workshop
